

CLAIMS:

1. A reflective bracket comprising:

¹²
a channel comprising a reflective material, a longitudinal axis, and at least one ventilation opening therethrough.

2. A reflective bracket in accordance with Claim 1 wherein said channel has
5 a parabolic shape.

3. A reflective bracket in accordance with Claim 1 wherein said at least one ventilation opening extends longitudinally along said channel.

4. A reflective bracket in accordance with Claim 3 further comprising a
¹⁶ shield positioned over said at least one ²⁰ ventilation opening.

10 5. A reflective bracket in accordance with Claim 4 wherein said shield is integral with said channel.

6. A reflective bracket in accordance with Claim 1 wherein said channel comprises a first side and a second side, said at least one ventilation opening extending laterally along said sides of said channel.

15 7. A reflective bracket in accordance with Claim 6 further comprising a flap extending from one of said first side and said second side.

8. A reflective bracket in accordance with Claim 1 further comprising at least one holding bracket extending from an end of said channel.

20 9. A reflective bracket in accordance with Claim 8 wherein said at least one holding bracket is integrally formed with said channel.

10. A reflective bracket comprising:

a channel comprising a reflective material, a longitudinal axis, and at least a first ventilation opening and a second ventilation opening therethrough, said first ventilation opening and said second ventilation opening extending obliquely to one another.

5 11. A reflective bracket in accordance with Claim 10 wherein the channel comprises a first side and a second side, said first ventilation opening extending longitudinally along said channel, and said second ventilation opening extending laterally along the sides of said channel.

10 12. A reflective bracket in accordance with Claim 11 further comprising a third ventilation opening extending laterally along said sides of said channel, said at least first ventilation opening positioned between said second ventilation opening and said third ventilation opening.

 13. A reflective bracket in accordance with Claim 11 further comprising a shield over said first ventilation opening.

15 14. A reflective bracket in accordance with Claim 13 wherein said shield is integrally formed with said channel.

 15. A reflective bracket in accordance with Claim 10 further comprising at least one holding bracket extending from said channel.

20 16. A reflective bracket in accordance with Claim 15 wherein said holding bracket comprises a plurality of fingers.

 17. A reflective bracket in accordance with Claim 15 wherein said holding bracket is integrally formed with said channel.
